**ELEGRA APPs — POS MIS SYSTEM CORE STRUCTURE**

# POS, How it's Work ?

ELEGRA APPs, POS system is the spot where your customer makes the payment for goods or services that are offered by your company.

Point of sale systems are systems that enable the business transaction between the client and the company to be completed. POS system is a computerized network that consists of the main computer linked with several checkout terminals and supported by different hardware features starting from barcode scanners and ending with card payment terminals.

# Why ELEGRA Inventory ?

Not all inventory management systems are created equal. At ELEGRA APPs we believe in tracking everything you do accurately and systematically.

Our inventory management software is designed to track everything you sell in a centralized. All sizes, colors, and other additional features are easily accessible. Our reporting tools will help you view sales and stock levels, from basic information to more detailed reports, so you can easily find how long those extra small sizes have been taking up valuable shelf space.

Manage all products across all locations and seasons from your inventory management dashboard. Add new products, create detailed descriptions, upload pictures, and change prices within the platform to update across all systems to increase sales and guarantee accuracy. Because our system keeps a history of inventory, you can more easily reconcile your counts and write-offs.

# Where to Apply ? **Whatever your business ELEGRA APPs will support you!**
